

Senior Java Software Engineer

Location: Blacksburg, VA

Tax term: FULLTIME

Pay rate: DOE

**HARMONIA**, INC., a world leader in Model Driven Application development, is seeking a Senior Java Software Engineer to join our world class team working on cutting edge projects to enhance the current state of the art in learning management. **Harmonia**, inventors of UIML, is building groundbreaking solutions for clients such as Raytheon and the Department of Defense (DoD). By utilizing their skills in creating Java code, participating in product design, working with clients to determine their needs and requirements, and maintaining a high level of knowledge in software development, the person we are seeking will be instrumental in helping **Harmonia** create next generation products and services.

**We are seeking candidates with the following skill set:**

HTML/CSS, Flash

Knowledge of SCORM

Experience with Learning Management Systems (LMS), Learning Content Management Systems (LCMS), and Intelligent Tutoring Systems

Experience with Navy Command and Control and DoD applications

**Qualifications for this position include:**

5+ years of professional experience that includes system analysis, software design, and Java development

4-year college degree (B.A. or B.S.) in Computer Science or related field, or equivalent combination and relevant experience.

**We offer a lucrative benefits package that includes:**

One of the country's best Medical Insurance plans (including both dental and eye care) available.

401 (K) plan (Company matches 5% after twelve months of service)

Stock option plan

Short and Long Term disability

Due to our government contract research work, US Citizenship and background checks are required for all positions.
