

Northrop Grumman, one of the largest defense contractors in the world, has purchased the LiquidApps® product suite. Northrop Grumman sees LiquidApps® as a key differentiator in securing future contracts. In order to get the most out of the product they also purchased a week-long training session. One of the students had the following to say about the event:

“One of the best, if not the best, week-long training sessions I've taken on tools and methods. The session had great examples and great instructors, all with an intimate knowledge of the tool, our processes, and our problems. The take away being a tool with supporting skill sets that I can immediately apply to our problem sets in the Future Combatant programs.”
